

October, 2007

International Flame Research Foundation/American-Japanese Flame Research Committees (AFRC)
International Symposium, Waikoloa Beach, Hawaii

David Schmitt, President and CEO of Increase Performance Incorporation, based in Tulsa, Oklahoma, presented a paper on the FurnaceMANAGER System, the continuous online diagnostic measurement and intelligent monitoring, of various combustion burners, and furnace operations. The paper also outlined how the FurnaceMANAGER provided superior flame control and flame management, tube problem assessment, and sending early warning signals to the control room.
